

University of Missouri System

COLUMBIA | KANSAS CITY | ROLLA | ST. LOUIS

University employees are an important line of defense against cyber-criminal attacks. The university has contracted with SANS, an organization that specializes in security training and research, to deliver a series of online information security training modules.

To access the training modules, please log in to the University of Missouri "myHR" website. Go to the myTraining section and click on the link provided for "MakeITSafe Training". You must complete all of the provided modules within 30 days, in order to comply with the training requirements within the UM Information Security Program*.

- You are the Target
- Social Engineering
- Email and Instant Messaging
- Mobile Devices

*Some University employees may be required to take additional modules based upon their job duties.

Online resources related to this new training requirement are listed below:

UM MakeITSafe: <http://MakeITSafe.missouri.edu>

SANS: <http://sans.org/about/>

Mandatory training policy: <http://infosec.missouri.edu/hr/security-training.html>

UM Information Security Program: <http://infosec.missouri.edu>

Certificates are generated from the SANS system and are distributed via email. You will receive a separate email from "UM CISO [<mailto:noreply@securingthehuman.org>]" once you have completed the required training. Please keep this certificate for your records. The Division of IT will maintain electronic confirmation of your completion of this training.

If you have any questions, please contact me at umciso@umsystem.edu or contact your campus Information Security Officer (ISO). The ISO for each campus can be found at <http://infosec.missouri.edu/admin/iso.html>.

Beth Chancellor
UM Chief Information Security Officer
